# INTRODUCTION TO MANULI HYDRAULICS

Manuli Hydraulics (established in 1973), part of the Manuli Rubber Industries Group, is active in the design, manufacture and sale of a wide range of hoses, connectors and machines for conveying power in high/very high pressure hydraulic circuits and fluids in refrigeration units.

Manuli Hydraulics offers a complete integrated package of hydraulic hoses and fittings, designed to ensure robust fluid connector solutions for modern hydraulic applications and long lasting performance. From design to delivery, the successful integration of hoses and fittings is essential to producing quality assemblies.

With extensive R&D investment and the expertise of our Application Engineers we can provide both bespoke solutions for OEM applications and distribution products. Our hose range encompasses and exceeds the requirements of ISO, SAE and EN specifications. End terminations include BSP, JIC, DIN, SAE and JIS.

## MAIN APPLICATIONS

- Hydraulic systems for industrial machinery
- Hydraulic systems for off-highway vehicles
- Hydraulic systems for open pit and underground mining equipment
- Mobile refrigeration systems and air conditioning systems for off-highway vehicles
- Rotary systems for drilling platforms

## PRODUCT OFFER

- Assembling machines
- Hose assemblies and hose kits for mobile refrigeration
- Hose assemblies for high and very high pressure applications in general hydraulics
- Hose assemblies for water cleaning & water blasting applications
- Hose fittings
- Hose protection
- Other fluid connectors
- Quick couplings
- Rotary hose assemblies for drilling rigs
- Staple-lock adaptors and fittings
- Textile braid reinforced rubber hoses
- Wire spiral reinforced rubber hoses
- Wire braid reinforced rubber hoses

Manuli Hydraulics completes its product offer with hose systems for:

- Off shore oil rigs
- Buoys
- Pipeline terminals
- Ship to shore

Open pit mine

Underground mining

General construction

Oil & gas

Agriculture

Refrigeration

## QUALITY

Quality is the driving force for all Group activities.

Manuli Hydraulics, as part of the Manuli Rubber Industries Corporation, was the first European hydraulic components manufacturer to achieve the ISO 9001 certification, in 1992. All manufacturing plants are currently ISO 9001 certified. The Chinese and Italian plants achieved also the API Q1 quality approval.

Manuli Hydraulics' products meet and exceed the highest industry standards, proved by the achievement of many technical approvals issued by third parties and accreditation bodies.

## International Technical Approvals

ABS (American Bureau of Shipping), BV (Bureau Veritas), BWB (Germany Army), DNV (Det Norske Veritas), GL (Germanischer Lloyd), INDIA Mod (Ministry of Defence – India), KRS (Korean Register of Shipping), LR (Lloyd's Register of Shipping), MADI-CERT (GOST-R accred.– Russian Fed. & CIS) MED (Marine Equipment Directive), RINA (Italian Bureau of Shipping)

## Mining Approvals

FRAS (Fire Resistant and Anti-Static Australian Dept. Mineral Resource), HBL (French mines), LOBA (German Mines), MAKNII (S.M.R.I. Work Safety in Mining Industry – Ukraine), MSHA (Mine Safety and Health Administration – USA), Polish B Safety certification, MA (Chinese Mining Approval)

## Oil & Gas Approvals

API (American Petroleum Institute) Monogram License 7K

# ENVIRONMENTAL POLICY

The environment is integral to Manuli Hydraulics' mission of providing safe, reliable and efficient solutions for sustainable fluid power. In compliance with ISO 14001 regulation, the Group pursues the goal to develop the offer through the engineering of products and operational methods with low impact on the environment and people's health in their everyday life.

From a manufacturing point of view, the Environmental policy extended and renewed ISO 14001 Certificates for plants in China, Czech Republic, India, Italy, Poland, South Korea and the UK.

## ECO-FRIENDLY PRODUCTS

- Wire spiral reinforced hose range for biological and mineral oils compatibility
- Tractor hose range updated with new Chlorine free Fire resistant cover compound for underground Mines
- Ultrastar hose range with HFO1234y, the refrigerant gas designed to reduce the climate impact of air conditioning
- Cr3+ zinc plating treatment

## HEALTH & SAFETY POLICY

With a strong commitment to safeguarding the health and safety of its employees. Manuli Hydraulics was the first company in the hydraulic sector to achieve the OHSAS certificate in 2005. The Group has progressively introduced the achievement of this Certificate to its manufacturing plants.

# INNOVATION

Manuli Hydraulics' R&D activities are based at the Innovation Centre in Bologna (Italy) which also oversees the R&D centres in France, Poland, China and India.

All research centres are equipped with advanced facilities. Main laboratories feature special rooms that allow researchers to simulate the most extreme environmental conditions: heat, cold, fog, saline environments, vibrations and many others.

Manuli Hydraulics employs a team of highly skilled international engineers to offer integrated solutions to Manuli customers in terms of quality, product range and cost saving.

Furthermore, the Innovation Centre works closely in confidential alliances with Original Equipment Manufacturer customers, to design and develop bespoke product solutions.

This technological cooperation with OEMs helps our engineers to better understand the ever more demanding requirements of fluid conveying applications, enhancing our capability and expertise in providing complete fluid connector solutions.

INNOVATION CENTRE - Italy  
*"Excellence is attainable with the utmost passion"*

# A GLOBAL SERVICE NETWORK

Manuli Hydraulics provides technical competence and commercial support, always guaranteeing worldwide availability of its products and services.

The sales & service network is organised as follows:

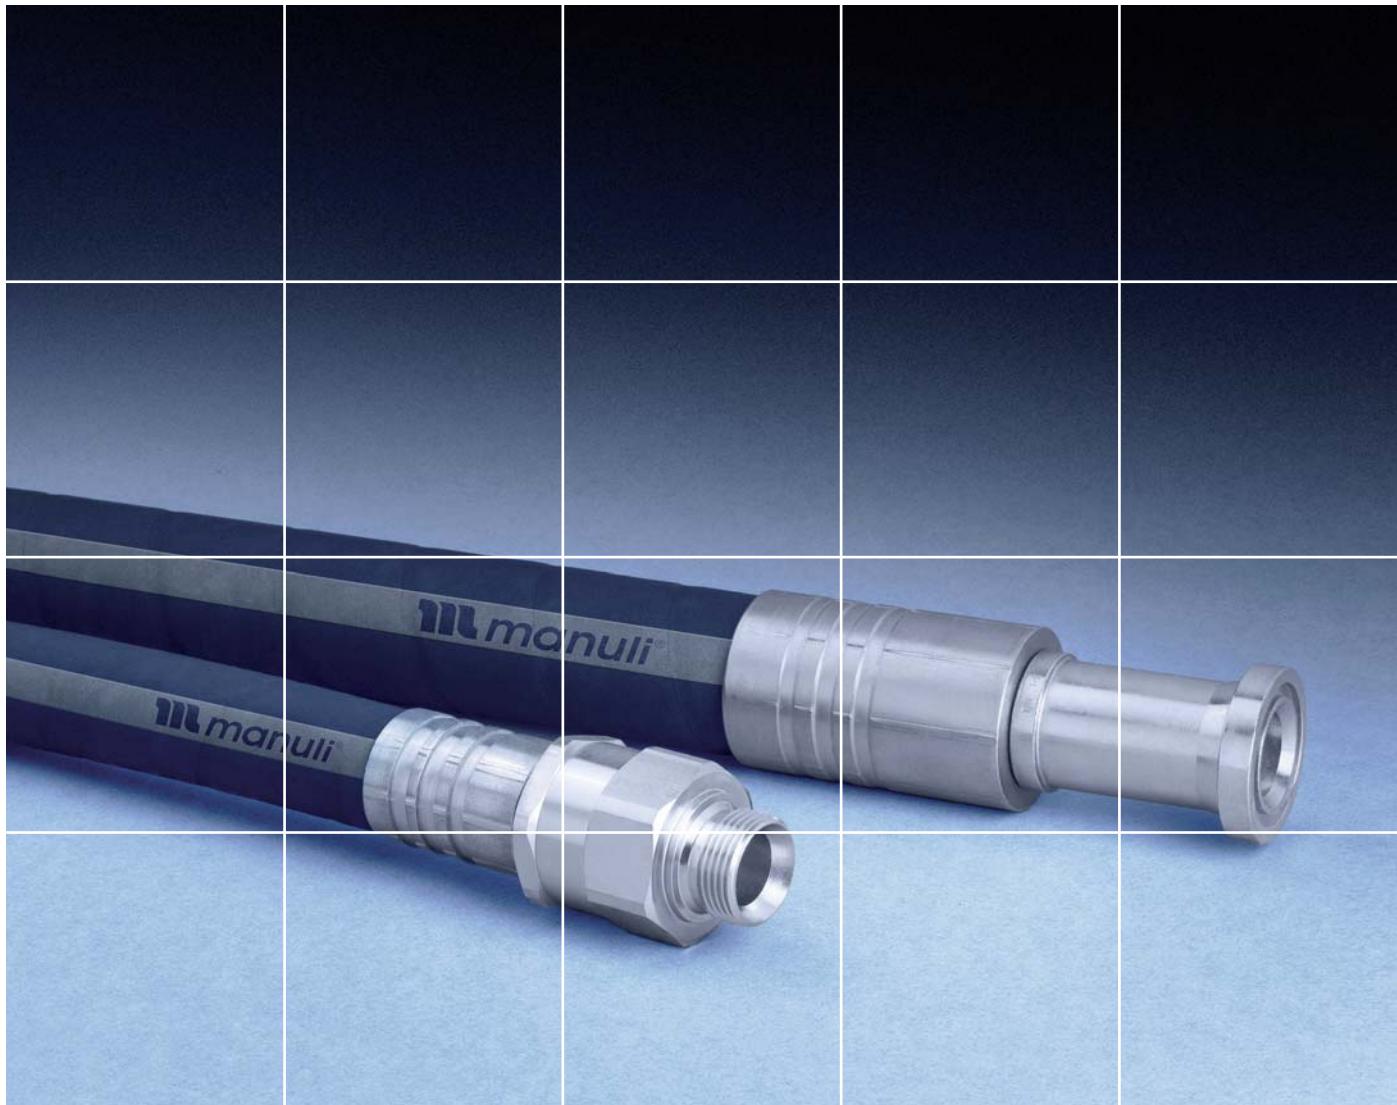

- **WHOLESALE FACILITIES** in Western & Eastern Europe, Americas, Asia and Oceania;
- Fully owned OEM ASSEMBLING FACILITIES in Europe and East Asia;
- OEM ALLIANCE PARTNER FACILITIES with established providers in strategical markets
- **DISTRIBUTOR NETWORK** with a widespread presence all over the world

The network is integrated by services delivered through the private area of [www.manuli-hydraulics.com](http://www.manuli-hydraulics.com).  
The online platform offers:

- technical products database and related approvals
- fluid compatibility and a wide offer of e-technical online tools
- on-line store
- order tracking and management
- e-learning platform

# HOSES

The Hydraulic hose range is specifically designed for hydraulic systems and equipment in many different sectors, such as construction machines, mining, industrial processes, agriculture, road construction equipment, drilling, forestry machines, material handling and lifting, road transportation, marine and off-shore, and many others.

## UNIVERSAL

The Manuli Hydraulics UNIVERSAL hose range meets the ISO, EN, SAE, International Norms while the EXTREME hose range is designed to meet special performance and requirements in the OEM market, often in severe applications.

## EXTREME

The EXTREME hose families follow **TRADITIONAL** norms and are designed to guarantee superior performance such as abrasion, weather, ozone resistance and many others. The EXTREME hose range includes also advanced solutions to match performance from the light weight (PILOT) to the high flow rates (XTRAFLOW) (see "key performance" column in the next page).

**ISOBARIC** hoses offer a user friendly method of hose selection thanks to the constant pressure levels at any size.

## APPLICATION ORIENTED

The hose range is completed with the group of **APPLICATION ORIENTED** products which are designed for specific applications.

✓ Recommended for open pit and underground mining.

Manuli Hydraulics' Connectors range, composed of 7000 items, represents a best in class fluid transport system. It is designed according to the international standard and specific requirements set by important OEMs, it is fully compatible with our hoses and engineered with a high safety factor and eco-friendly zinc plating treatment.

MARKET REQUIREMENT	MANULI HYDRAULICS' OFFER
Crimped fittings	→ MF2000 & MF3000
Thread less fittings	→ EASY FIT & FAST FIT
Swivel fittings	→ ROTOFIT
Quick release coupling	→ Q.SAFE
Check valve	→ MQS-CV - MQS-CVC
Soft rock coal mining fittings, adaptors & ball valves	→ STAPLE, SUPER & FLUSH-FIT LOCK

## NOTES

## WATER CLEANING

The **water cleaning** hose range is dedicated to hobby and professional water cleaning machines, with cold and hot water (not suitable for vapour steam applications).

It is designed according to safety norm IEC-2 with safety factor burst/working pressure 4:1.

Please note this product is designed for pressure wash applications. Any different use may reduce service life.  
Please contact Manuli Hydraulics for more information.

## WATER BLASTING

The **water blasting** hose range is designed with the criteria of maximum robustness and easy handling in mind, complete with a dedicated fitting solution, to meet the safety and performance criteria connected with blasting applications.

Safety factor burst/working pressure is 2,5:1, it complies with international specifications (AS/NZ 4233.2, RMA-USA, ISO 7751, BFPA-UK, EN1829-2).

## NOTES

The Manuli Refrigeration offer consists of reinforced rubber hoses, fittings, hose assemblies and kits. The Refrigeration offer is designed specifically to satisfy the most restricted requirements for:

- bus air conditioning and mobile refrigeration systems for "on-road industrial vehicles"
- air conditioning systems applied on off-highway industrial vehicles such as: agricultural machines, earth-moving machines, forestry machines, etc.

A special "field-attachable" fitting technology allowing a convenient mounting and disassembly operation is part of the product offer, in particular:

- Frigoclic® fitting range technology
- Reusable fitting range technology

Furthermore crimped fitting solutions are completely integrated on all hose lines.

*Bus air conditioning*

*Off highway air conditioning*

*Mobile refrigeration*

#### SELECTION GUIDE:

- **RefriMaster** - Universal hose compatible with the most common refrigerants and compressor lubricants; Extremely low permeability to refrigerant fluid; compact dimensions; low weight and high flexibility; Field attachable and crimped solutions available with the same FrigoClic™ insert.
- **RefriMaster Plus** - Extremely low permeability rate with a new reduced bending radius and improved resistance to kinking effect. Improved temperature resistance up to 140°C. Same double assembling solution (field attachable or crimped) with the FrigoClic™ insert
- **RefriStar** - High mechanical strength and high flexibility. Freedom of choice between the field attachable and the crimped assembling solution.
- **RefriFast** - Higher compact dimensions within type A hoses and outside diameter comparable with reduced barrier hoses; Low weight; Easy installation in space constraints; High flexibility and low bend radius;
- **UltraStar** - "A Type B hose with the permeability performance of a Type E". High mechanical strength, reduced bending radius and an extremely low permeation rate with the benefits of an all rubber hose. Same assembling solutions available for the RefriStar hose.

Manuli Hydraulics' assembling machines are part of the complete product offer and are designed according to high quality standards. The full range is optimised through Manuli's long experience in the hydraulic market and it is recommended for high performance and safe hose assembling procedure. It is also fully tested and validated in our Laboratories as well as in field.

By using Manuli assembling machines you will achieve factory quality assemblies and long service life as well as complying with product liability requirements.

Special machines not included in this selection guide are available upon request, as well as the original spare parts.

Manuli Hydraulics' products have to be assembled strictly in accordance with Manuli instructions and recommendations. The original assembling information chart is the only official guide to selecting the proper hose and fittings combinations and determine crimping compatibility

Don't mix and match: use always Manuli's original components.
